iD Tech Camps Diploma

Justin J. O'Boyle

Congratulations on your graduation from iD Tech Camps.

July 19, 2013 at Seton Hall University: Intro to Programming with Scratch & Java

A note from your Instructor: M-Pulz

Justin, I was blown away by what you produced this week! Though you came in with a little prior Java knowledge, you maintained great interest in building upon it. The quality present in every piece of your project was astounding and showed a great attention to detail. You focused in on the parts that mattered most and raised every bar in sight - pushing for higher levels of complexity that made both of your projects very fun to play with. You were certainly a pleasure to have in class and I have no doubt that you will go on to write code in the big leagues should you choose to continue with it!
