iD Tech Camps®

Justin O'Boyle

has officially completed

C++ Programming

held at

Seton Hall University

7/10/2015

Continuing Education Units Earned

A Personal Note from your Instructor: Luke "Spaz"

Justin, I had a blast playing your text based adventure game and had a great time with the inventory system and random items you could find throughout your game. Your ability to code is impressive and have no doubt it will benefit you in your life. The sky is the limit for you.
